DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to a product (spacer), classified in class 206, subclass 593.
- II. Claims 25-29, drawn to process of using (method of stacking), classified in class 29, subclass n/a.
- III. Claims 30-39, drawn to process of making (method of forming spacers), classified in class 53, subclass n/a.
- IV. Claims 40-59, drawn to apparatus for assembly, classified in class 53, subclass n/a.

The inventions are distinct, each from the other because of the following reasons:

The product as claimed can be made by another process that does not require paperboard or being cut.

The product as claimed can be made by an apparatus that bonds the stack of sheets.

The product as claimed can be used as packaging cushioning at the perimeter of an object disposed in a container.

The process of making as claimed can be practiced by another materially different apparatus or by hand.

Art Unit: 3728

Because these inventions are distinct for the reasons given above and the search required for each particular Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
